No topological signal beyond composition (controls: i.i.d. p=0.39, tandem repeat p=0.010, z=-10.2)
(a) vs mono — preserves base counts
z = -1.64
p = 0.100
200 shuffles
POLE observed
shuffles
$H_1$ total persistence
(b) vs dinuc — preserves dinucleotide counts
z = -0.50
p = 0.627
$H_1$ total persistence
(c) vs codon — preserves codon usage
z = -0.92
p = 0.428
$H_1$ total persistence
